

Welcome to Honors Probability & Statistics

Mr. Miller

Welcome to Honors Probability & Statistics. This course is designed to challenge your mathematical abilities with the goal of preparing you for the wide range of higher math courses. Your success in this course will be determined solely by **hard work, effort** and **perseverance**. You must do all of your home learning daily. You are responsible for taking good notes and paying attention in class. Procrastination on your home learning assignments will adversely affect your grade and learning in my class. You must be committed to set aside time in your daily schedule to do the homework assignments on a routine basis. This is the key in conquering mathematics.

CLASS SYLLABUS

- ★ Your textbook is *Elementary Statistics: Picturing the World 7th Edition* by Farber and Larson. It is available on your student portal. A class set is available for use at school.
- ★ I will not follow the book chapter by chapter, but rather to optimize the learning experience.
- ★ **Class Description** – Honors Probability and Statistics is a courses that expands upon the topics learned in previous courses including Geometry and Algebra. I will NOT be teaching basic arithmetic or skills learned in Algebra and Geometry. Any remedial learning is the responsibility of the student. I will provide resources on my web site for help with required pre-requisite skills.

Classroom Procedures:

1. You are required to bring **all** materials necessary to class **everyday**.
2. All work must be done **legibly in pencil or erasable pen**. Digital work is acceptable if sent to my email with the specific assignment (labeled in the gradebook) as the subject line. Most of our work in this class will be done at mymathlabforschools.com. You will access the site directly.
3. Class activities and assignments will vary. Expect to be actively engaged during the whole class period.
4. You are expected to take care of your business, as in using the restrooms, sharpening pencils, buying candy, etc during the 10 minutes between classes. Once the class begins you are to be seated and engaged. The bathroom pass will be limited to non-lecture times and at the discretion of the teacher.
5. A graphing calculator is not required for the class. I recommend downloading the DESMOS graphing calculator app available for both Android and Apple devices. StatCrunch is available on mymathlab for your use as well.
6. It is recommended that you have access to a laptop to complete assignments, take quizzes and tests, etc. When necessary you will be able to use a personal device.
7. Cell phones and other electronic devices are useful learning tools, but any disruption in learning will not be tolerated via MDCPS policy.

Grading Policy:

Your learning will be assessed in the following ways:

- 1) **Home Learning.** Should be completed daily, assignments and their due dates will be announced in class and/or posted at miller.mathevolution.com. Work submitted after the due date will be penalized a minimum of 25% unless a signed excused admit is presented. The maximum penalty will be 50%. ALL LATE ASSIGNMENTS should be accompanied by an email (scottmiller@dadeschools.net) or they will not be graded. It is acceptable to send a photo of your work, but it should be available for review in your notebook.

Some home learning assignments will be graded for completion and some may not be graded at all. **Home Learning is 30% of your grade**

- 2) **Quizzes** will be given frequently and will be composed of questions similar to those assigned in home learning and important information from the lectures. **Quizzes are 30% of your grade.**
- 3) **Exams** are given at the end of each chapter (usually 3-4 per quarter). To be successful in this class you must do well on exams. Exams cover the same topics as the quizzes and assess how well you retain the skills and information. **Exams are 40% of your grade**
- 4) **Grades** are calculated with each category weighted as indicated, not by the number of grades. The weighted average is assigned a letter grade as follows:

Grading Scale:

	A(4)	B(3)	C(2)	D(1)	F(0)
Percentage per assignment	90-100	80-89	70-79	60-69	59 and below

REQUIRED SUPPLIES:

Each student is required to have in class each day the following materials:

1. Notebook and sharpened pencils and erasers or erasable pens.
2. Graph Paper (when necessary)
3. Graphing Calculator (TI-83 or 84 recommended) or DESMOS graphing calculator app on a device.

Contacting Mr. Miller:
